COURSE

About the Course

This program is designed to assist you as you develop your employees into the functional role of a global well planner. By utilizing live virtual instruction session in a workshop format, attendees will be equipped to evaluate and apply the practical knowledge they receive in the Well Planner Development Program and apply the industry validated knowledge and skills with relevant on-the-job learning at the well site. This is an advanced level, hands on workshop and it is strongly recommended that attendees first complete the Well Site Supervisor Development Program to gain the critical fundamental level knowledge required in the Well Planner role.

Recommended program duration of 7 months, with the assumption that the individual would spend 2 weeks in office working with an experienced engineer.

Pre-requisite: Well Site Supervisor Development Program and 3-5 years of field experience in the Well Site Supervisor role.

Well Planner Development Program requires a minimum number of participants to go through the Workshops together virtually. Synchronous sessions required.
