

## Greenhouse Gas Emissions Tracking Over Time

### MODULE

#### About the Skill Module

This skill module illustrates how greenhouse gas (GHG) emissions are tracked over time. It introduces the concept of a base year, its selection, justification, and recalculation. Furthermore, it explains significance thresholds and when a base-year recalculation is permissible. It also provides the opportunity to undertake an actual base-year recalculation.

See demo online learning module

#### Target Audience

Anyone wanting to commence their learning or to further consolidate their fundamental knowledge and competence with regard to Greenhouse Gas

#### You Will Learn

You will learn how to:

- Assess an organization's greenhouse gas (GHG) emissions over time

- Explain the concept of a base year
- Clarify the rules for recalculation of base-years
- Select a base year
- Justify the selection
- Establish a base-year recalculation policy and process
- Consider significance thresholds
- Identify structural and organizational changes
- Undertake actual base-year recalculations
