

# **Instrumentation Selection for Oil and Gas Applications (Level)**

#### MODULE

### **About the Skill Module**

This skill module explains the reason for measuring level and the various technologies available to measure level.

See demo online learning module

# **Target Audience**

Process, chemical, and mechanical engineers, (i.e., non-instrumentation and non-electrical disciplines), as well as other technical and non-technical professionals with little or no background in IC&E systems.

## You Will Learn

Participants will learn how to:

- · Review basic reasons for measuring level
- · Discuss the pros and cons of using a bridle
- Explain the basic functions of a stilling well
- Describe how a simple sight glass is used to monitor the level
- Review how float systems can provide direct reading outputs
- Examine the use of hydrostatic pressure measurement in an open tank level measurement
- Describe the use of electronic remote diaphragm seals
- · Discuss the working principle of ultrasonic gap point level meter
- · Examine the working principles of conventional pulse radar
- Describe a simple laser-based level measuring system
- · Examine the working principle of a Geiger Muller tube
- · Explain principle of tank strapping

## **Product Details**

Categories: <u>Upstream</u>

Disciplines: Instrumentation, Controls & Electrical

Levels: Basic

4/27/24, 7:38 PM

Product Type: Individual Skill Module

Format: On-Demand

Duration: 4 hours (approx.)

\$395.00
