

Operational Boundaries for Greenhouse Gas Inventories

MODULE

About the Skill Module

This skill module introduces operational boundaries in GHG emissions accounting, including the categorization of GHG emissions into scopes 1, 2, and 3. It provides a clear understanding of the sources of both direct and indirect emissions.

Whether you are a sustainability professional, an environmental consultant, or anyone seeking to enhance their knowledge of GHG emissions accounting, this course will equip you with essential skills for effectively managing and mitigating organizational greenhouse gas emissions.

Target Audience

Anyone wanting to commence their learning or further consolidate their fundamental knowledge and competence regarding Greenhouse Gas (GHG) management.

You Will Learn

You will learn how to:

- Define and distinguish between control and equity share Operational boundaries
- Apply different greenhouse gas (GHG) emissions inventory consolidation approaches
- Account for GHG emissions within these different boundaries
- Interpret the various associated financial and equity definitions
